In the fall of 2001 we sent letters of invitation to over 100 emerging and established artists in New York, Vienna, Bratislava and Toronto – to stage their "Death in the Studio" for our book project. At each death scenario, of the 61 artists who responded, we both took a number of photographs and then edited our shots. The resulting edits *document* the scene with one photograph by Hannes, the other by Niki.

Our first *studio visit* was in May 2001 in Brooklyn, New York. In late September 2001 we began a four day rally in Vienna and Bratislava, which took us to 23 different sites. We continued taking "studio death snapshots" later that fall in New York — on and off until the summer of 2002. We made our final studio visits in Toronto where we photographed the remaining artists in the last week of June 2002.

A total of 61 artists and artist groups participated in our project. We extend warm thanks to each of them!
